

LB8-UM06E Cabinet loudspeaker 6W metal square

The LB8-UM06E is a general purpose, cost effective 6 W cabinet loudspeaker for speech and background music reproduction.

Suitable for 100 V connection with power tapping for adjusting the sound level to meet the needs of the respective area.

The robust, yet aesthetically designed metal enclosure offers protection in areas where vandalism is a potential hazard.

Functions

Voice Alarm applications

Voice alarm loudspeakers are specifically designed for use in buildings where system performance for verbal evacuation announcements is governed by regulations. The LB8-UM06E Loudspeaker is designed for use in voice alarm systems and is EN 54-24 certified and compliant with British standard BS 5839-8.

Protection

The loudspeakers have built-in protection to ensure that fire damage to the loudspeakers does not cause failure of the connected circuit. In this way system integrity is maintained, ensuring loudspeakers in other areas can still be used to inform people of the situation.

Connections

The loudspeakers have a ceramic screw-terminal connection block, thermal fuse and heat-resistant, high-temperature wiring.

- ▶ Suitable for speech and music reproduction
- ▶ Robust metal enclosure
- ▶ EN 54-24 certified
- ▶ BS 5839-8 compliant

Certifications and approvals

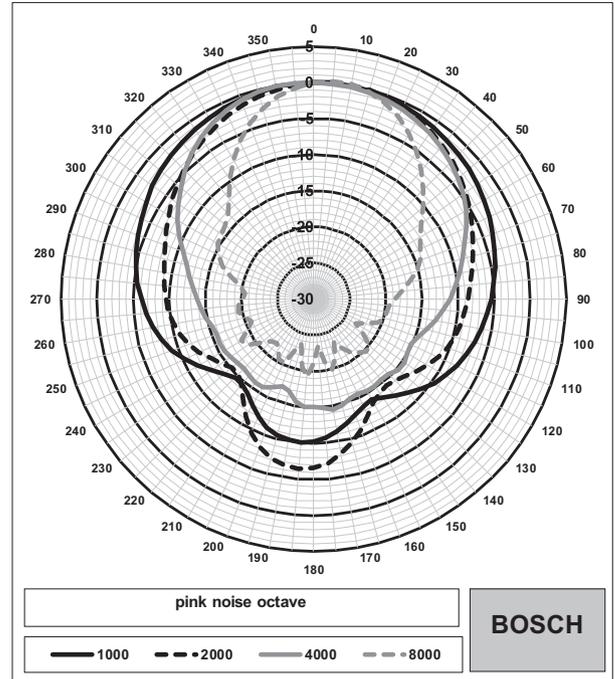

All Bosch loudspeakers are designed to withstand operating at their rated power for 100 continuous hours in accordance with IEC 268-5 Power Handling Capacity (PHC) standards. Bosch has also developed the Simulated Acoustical Feedback Exposure (SAFE) test to demonstrate that they can withstand two times their rated power for short durations. This ensures improved reliability under extreme conditions, leading to higher customer satisfaction, longer operating life, and lessens the chance of failure or performance deterioration.
